**Subject:** Microsoft Settlement

i, personally, think that microsoft has given up the notion that they have any responsibility to uphold any sort of law. as a citizen, i cannot steal or threaten others, or extort others into buying things from me. i don't see why they should be held to a different standard than i am. this settlement is so weak as to be laughable. microsoft has demonstrated time and again their lack of respect for the justice system and their previous 'settlements'.. and even now, they buy up property after property, and you aren't stopping them.

i pay taxes, and as a taxpayer, i'm tired of their lawlessness and ego. is our government bought and purchased?

fix this injustice.
